PROFESSIONAL SUMMARY

B.Tech CS student at Karunya University with a focus on Full-Stack architecture, AI platform engineering, and high-fidelity technical systems. Dedicated to building secure, scalable e-commerce ecosystems and simulation engines.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer

Present

Architecting end-to-end web ecosystems for diverse clients, specializing in **scalable React architectures** and **Firestore backends**.

Conceptualized and deployed production-grade platforms including **Wazabi E-commerce** and **DMPkart**, implementing real-time inventory management.

Optimizing performance and accessibility for high-traffic applications, achieving superior Lighthouse scores and improved user metrics.

FEATURED PROJECTS

Wazabi

React, Node.js, Firebase, Razorpay

Full-Stack E-commerce Ecosystem

Architected comprehensive retail platforms with **real-time inventory synchronization**, atomic stock validation, and secure payment integration.

Engineered high-performance administrative dashboards with **multi-image processing** and automated category-based size logic.

Lumina AI Assistant

React, TypeScript, Ollama (Llama-3)

Privacy-First AI Tutoring Platform

Architected a privacy-first AI platform by migrating external API dependencies to **locally-hosted inference pipelines (Ollama)**.

Integrated speech-to-text mapping and dynamic interactive Flashcards directly from LLM inferences.

Developed a sophisticated React frontend with state-driven conversational UI logic.

Edgelytics

Python, Flask, Arduino DHT22

Edge Computing IoT Framework

Constructed an edge-computing framework to ingest and manage real-time telemetry from Arduino microcontrollers.

Implemented a **local anomaly-detection algorithm** to trace impossible environmental data spikes.

Integrated device metrics through a scalable Python Flask backend to a live dashboard.

TECHNICAL SKILLS

Languages TypeScript, JavaScript, Python, C/C++, HTML/CSS

Frameworks React, Vite, Flask, Tailwind CSS, Tkinter

Tools Ollama, Firebase, Git/GitHub, VS Code

EDUCATION

Karunya Institute of Technology and Sciences

2025 - 2029

B.Tech Computer Science Engineering

St Hilda's School Ooty

2019 - 2025

ICSE
